EDUCATION

Princess Sumaya University of Technology (PSUT) — B.S. in Computer Science — Oct 2022 – Aug 2026

Amman, Jordan · Degree recognized by Ministry of Higher Education in Kuwait.

Relevant Coursework: Data Structures & Algorithms, Database Systems, Web Development, Computer Networks, Operating Systems, OOP in C++, Computer Organization.

KEY ENGINEERING PROJECTS

Smart Dynamic Bus System (SDBS) FLAGSHIP | Flutter, Firebase, Python, YOLOv8n, OpenCV, Raspberry Pi — github.com/Aldani-MO/smart-dynamic-bus-system

- Architected an end-to-end municipal transit optimization platform featuring real-time synchronized Flutter mobile apps across Passenger, Driver, and Admin roles via Google Cloud Firestore.
- Engineered an on-bus edge-AI vision pipeline running on Raspberry Pi using YOLOv8n & OpenCV to count waiting passenger queues in real-time, utilizing an offline SQLite transaction queue for zero data loss during network dropouts.
- Formulated and deployed autonomous route decision algorithm (STOP, SKIP, EARLY-DEPART) reducing unnecessary idling and transit delays based on bus capacity thresholds.
- Integrated contactless QR boarding validation and an append-only digital ticketing wallet with irreversible audit logs.

Phish-Checker Heuristic Analyzer | Python, Docker, WSL/Linux — github.com/Aldani-MO/phish-Checker

- Designed a high-throughput CLI URL risk scoring engine evaluating 9 heuristic threat indicators (homoglyphs, URL shorteners, bare IP hostnames, suspicious TLDs, and brand impersonation).
- Containerized with Docker for standardized CI/CD automated analysis pipelines and zero-dependency cloud deployments.

Pharmacy Management System | C++, Object-Oriented Programming, Data Structures — Academic Portfolio

- Developed a modular desktop system implementing custom data structures to manage medical inventories, dynamic customer ledger tracking, automated billing, and low-stock alerts.

WORK EXPERIENCE

DigiTecHouse — Full-Stack Developer Intern — May 2026 – Aug 2026

Amman, Jordan

- Developed and maintained production web applications utilizing PHP and the CodeIgniter 4 MVC framework.
- Built responsive, mobile-optimized UI interfaces using modern JavaScript, HTML5/CSS3, and Bootstrap 5.
- Implemented dynamic visual content creation by integrating ContentBox.js drag-and-drop page authoring tools.
- Practiced Agile engineering with structured Git version control, branch peer-reviews, and test deploys.

Royal Pharmacy Group — IT Support Specialist — Jun 2023 – Oct 2023

Kuwait

- Managed network server infrastructure, local DNS, and hardware firewall rule enforcement.
- Configured, deployed, and secured Windows desktop environments and POS terminals across retail branches.
- Executed high-volume database inventory reconciliations utilizing advanced Excel macros and queries.

TECHNICAL SKILLS

Languages:	Python, Dart, JavaScript/TypeScript, PHP, C++, C#, SQL, HTML5/CSS3
Frameworks:	Flutter, Next.js (App Router), React.js, CodeIgniter 4, Tailwind CSS, Bootstrap 5
Tools & Cloud:	Firebase Firestore, Docker, OpenCV, YOLOv8, Git, Linux (Ubuntu/WSL), Raspberry Pi
Spoken:	Arabic (Native), English (Fluent)

EXTRACURRICULAR & LEADERSHIP

- **IEEE Xtreme 18.0 Programming Competition** (Nov 2024): 24-hour virtual competitive programming marathon solving algorithmic challenges.
- **Software Engineering Club (SEC) Committee**, PSUT (Nov 2024 – Feb 2025): Spearheaded digital media production, visual promotional assets, and workshop planning for tech events.
